

Contents

Chapter 1	More about Coordinates	2
1.1	Areas of figures in a coordinate plane	2
1.2	Distance and gradient	8
1.3	Mid-point of a line segment	14
1.4	Parallel and perpendicular lines	16
1.5	Combined problems in a coordinate plane	24
1.6	Equations of straight lines	30
Chapter 2	Laws of Indices	39
2.1	Basic index operations	39
2.2	Negative exponents	43
2.3	Indices and roots	46
Chapter 3	Polynomials.....	51
3.1	Addition and subtraction of polynomials	52
3.2	Multiplication of polynomials	55
3.3	Definition of algebraic fractions	57
3.4	Multiplication and division of algebraic fractions	62
Chapter 4	Change of Subject.....	68
4.1	Revision of equations	68
4.2	Formulas and substituting values into formulas	71
4.3	Change of subject	73

Chapter 5	Factorization of Polynomials.....	79
5.1	Factorization by finding common factors	79
5.2	Factorization of quadratics using the difference of two squares and perfect squares	82
5.3	Factorization of quadratics using the cross method	85
Chapter 6	Surds and Rationalization	90
6.1	Definition of surds	90
6.2	Operations on surds	91
6.3	Rationalization	96
Chapter 7	Angle Properties	101
7.1	Angle properties with intersecting lines	101
7.2	Angle properties with parallel lines	109
Chapter 8	Angles in Polygons.....	118
8.1	Interior angles in polygons	118
8.2	Exterior angles in polygons	125
Chapter 9	Congruent Triangles	131
9.1	Identifying congruent triangles	131
9.2	How to show two triangles are congruent	135

Chapter 10	Similar Triangles	142
10.1	Identifying similar triangles	142
10.2	How to show two triangles are similar	145
Chapter 11	Properties of Quadrilaterals	153
11.1	Properties of parallelograms	153
11.2	Properties of rectangles and rhombuses	160
11.3	Properties of squares and kites	165
Chapter 12	Graphical Presentation of Statistics	170
Chapter 13	Sets and Venn Diagrams	184
13.1	Sets	184
13.2	Venn diagrams	193
Answers		201
